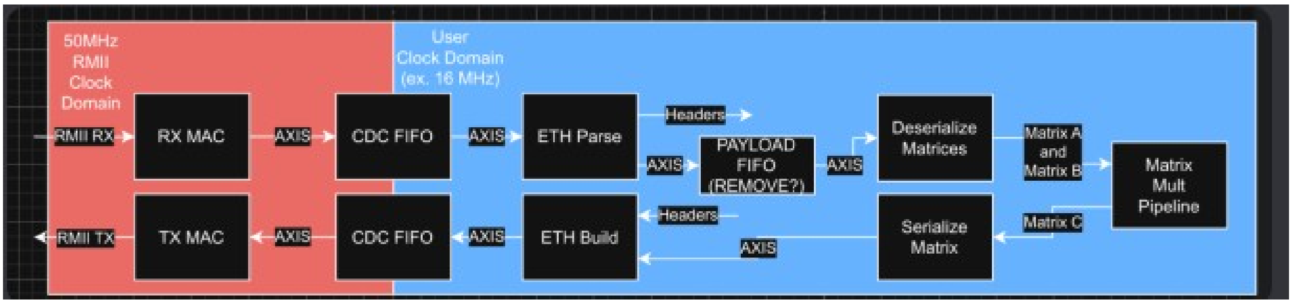
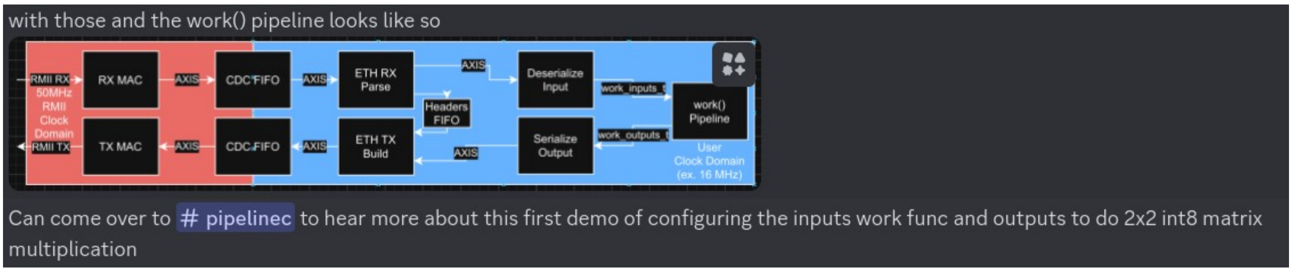
**********************Default**********************

PipelineC PMOD Ethernet connected to a pico-ice
03/06/25

**********************Default**********************

The current image which does work in the form matrix multiply.





Tested 03/06/25 in pico-ice repo branch test-dev-100424 in two shell below.
Following **“git clone https://github.com/develone/pico-ice.git -b test-dev-100424”**

If the command in the left image below is done before the command in right image below.

devel@pi5-70:~/pico-ice/PipelineC/pmod-ethernet/examples/net $ **./compile-work_test.sh**

The work_test.c is dependent on the successful build of gateware.bin see Appendix A.

In file included from work_test.c:30:
work.h:26:10: **fatal error:** type_bytes_t.h/work_inputs_t_bytes_t.h/work_inputs_t_bytes.h: No such file or directory
   26 | #include **"type_bytes_t.h/work_inputs_t_bytes_t.h/work_inputs_t_bytes.h"**
      | ^~~~~~~
compilation terminated.
